

GLUT10: A NOVEL GLUCOSE TRANSPORTER IN THE TYPE 2 DIABETES LINKED REGION OF CHROMOSOME 20Q12-13.1

ABSTRACT

5 GLUT 10 is an insulin-responsive glucose transporter gene located in the type 2 diabetes linked region of chromosome 20Q12-13.3. Isolated nucleic acids encoding the GLUT 10 glucose transporter, the encoded protein, antibodies that bind the protein, and methods of use are described herein.
